

EXPERIENCE

Desktop Application Developer

Earth 2

- 07/2024 - 09/2024

QLD, Australia

 - Developed desktop applications using React, Node.js, and Electron, managing both frontend and backend tasks.
 - Built a game launcher from scratch, delivering a seamless user experience with optimized game downloads and access.
 - Enhanced download speeds and overall performance of the launcher, improving user satisfaction.
 - Added new functionalities and optimized existing features to improve the launcher's capabilities.
 - Ensured the game launcher was compatible across different desktop environments.

Project Manager

WMK Tech

- 02/2023 - 07/2024

Baalbek, Lebanon

 - Managed and delivered over 20 projects, ensuring they met deadlines, budgets, and client expectations.
 - Worked with various technologies, including Laravel, React, Next.js, and more, to deliver high-quality solutions.
 - Developed and implemented services for POS, ERP, SAAS, and e-commerce platforms, tailoring them to meet specific client needs.
 - Led the development of web, mobile, and desktop applications, ensuring a smooth user experience across platforms.
 - Collaborated with development teams and clients to gather requirements and align project objectives with business goals.
 - Ensured the quality and performance of each project through rigorous testing and review processes.

Full-Stack Developer

TCG World

- 02/2022 - 02/2023

A, Netherlands

 - Contributed to both frontend and backend development, with a primary focus on designing and optimizing server-side architecture and functionality.
 - Designed and developed the official game website, ensuring a seamless user experience and responsive design.
 - Led blockchain initiatives, focusing on developing and integrating blockchain technologies into the company's ecosystem.
 - Developed and led the launch of TCG Coin, managing its deployment and ensuring seamless integration with smart contracts.
 - Implemented and optimized server-side features to ensure high performance, scalability, and security.
 - Collaborated closely with the game development, marketing, and blockchain teams to meet project requirements.
 - Developed APIs to support communication between the server and various applications, including blockchain-related services.

Web, Mobile & Game Designer & Developer

KTOPSOFT

- 01/2022 - 03/2025

Tokyo, Japan

 - Designed and developed responsive, intuitive user interfaces for web and mobile ecosystems, ensuring consistency across all platforms and devices
 - Implemented innovative game mechanics, controls and protocols to enhance user gaming experiences
 - Utilized languages including HTML5, CSS3, JavaScript for web development, and successfully adapted learnings for mobile app development using frameworks such as Flutter or React Native
 - Spearheaded the design of game storylines, characters, assets, and scenarios, paying close attention to detail regarding graphics, animation, sound and other elements
 - Adopted a player-centric approach in developing games, collecting and interpreting player data to refine and improve user experiences
 - Demonstrated strong capacity for problem-solving and debugging through consistent improvements in application functionality and performance
 - Collected and incorporated feedback from users to improve the design and flow of web, mobile, and gaming applications

SUMMARY

Hello there!

I'm Akio Ito, your friendly neighborhood front-end developer, mobile app aficionado, design enthusiast, and blockchain explorer! As a passionate tech lover, I've ventured into the captivating world of web, mobile, and blockchain development, always on the lookout for creating user-friendly interfaces that are clean, intuitive, and aesthetically pleasing. I'm privileged to channel this passion through my work at KTOPSOFT, where we bring innovative ideas to life.

Not just your typical front-end developer, I'm well-versed across the full stack with proficient knowledge in web, mobile, and blockchain solutions. My heart beats strongest for the MERN stack (MongoDB, Express.js, React, and Node.js) and blockchain technologies, enabling me to transform your vision into functional, efficient, and secure deliverables. Whether it's integrating decentralized systems or building smart contracts, I'm always ready to push boundaries and embrace the future of digital solutions.

I believe technology is a powerful medium for crafting interactive experiences, telling stories, and solving real-world problems. When I'm not coding, you'll find me exploring the latest tech trends, creating fresh designs, or dreaming up the next big idea. Join me on this journey, won't you? Here's to building an awesome, wired, and decentralized future—together!

Thank you!

SKILLS

React	Next.js	Node.js	Express.js
HTML	CSS	JavaScript	TypeScript
Tailwind CSS	Git	Redux	Bootstrap
GraphQL	PHP	Laravel	Angular
Vue.js	React Native	Python	SEO
Three.js	Smart Contract	Solidity	
Web3.js	MySQL	MongoDB	PostgreSQL
SQLite	Nuxt.js	Nest.js	Ant Design
Material UI	Mobx	TypeORM	Prisma
Ruby on Rails	Django	Ethereum	Solana
Rust	Golang	Bitcoin Script	Remix.js
Solid.js	Hardhat	Electron.js

EXPERIENCE

Front-End Developer

RIKKEISOFT

10/2019 - 01/2021 Minato, Japan

- Integrated the backend server-side logic onto the frontend for seamless user experiences, employing a deep understanding of Angular and Laravel.
- Converted wireframes and design layouts from a Graphic Designer into functional websites, staying faithful to design aesthetics and attention to detail.
- Applied SEO/SEM best practices and standards in coding the websites to improve the visibility, functionality and ranking in search engine results.
- Used React to create interactive UI components for improved web functionality and customer experience.
- Leveraged Next.js for server-side rendering, developing and implementing robust, high-performance software.
- Collaborated closely with UX/UI designers and backend developers to create comprehensive end-to-end solutions.
- Regularly engaged in performance tests, spotting and troubleshooting issues in frontend code.

Full-Stack Developer

HIKESIYA USA INC.

06/2016 - 09/2019 Yokohama, Japan

- Utilized a versatile tech stack consisting of PHP, Python, Vue.js, JavaScript, HTML, CSS, MySQL, PostgreSQL, and MongoDB to develop functional, user-oriented software solutions
- Developed server-side logic using PHP and Python, ensuring high performance and responsiveness across various applications
- Employed Vue.js for building user interfaces and single-page applications, optimizing ease-of-use and overall user experience
- Managed database solutions with MySQL, PostgreSQL, and MongoDB, implementing effective storage and retrieval systems to meet project requirements
- Constructed front-end elements using HTML and CSS, adhering to design specifications and ensuring seamless integration with backend components
- Regularly performed unit tests and code reviews to identify and rectify any potential issues, improving software reliability and performance
- Collaborated with cross-functional teams to identify project requirements, implement solutions, and deliver high-quality end-products on schedule

EDUCATION

Bachelor of Computer Science

Chiba University

04/2012 - 05/2016 Chiba, Japan

- Bachelor of Science in Computer Science, Graduated with Honors (if applicable)
- Dates of Attendance: 04/2012 -05/2016
- GPA: 3.9/4.0
- Relevant coursework: Web Development, Mobile Development, Game Design
- Data Structures, Database Management
- Chiba, Japan
