

Alexey D.

Work experience with ERP-systems and basic rate of qualification:

Name of the system	Work experience with system
MS Dynamics AX 3, 2009, 2012, 365	6 years
MS Dynamics CRM	13 years
Creatio	7
1c ERP	3

Certificates:

1. MCTS: SQL Server 2005
2. MCITP: Database Developer on SQL Server 2005
3. 55201AC: Microsoft Project 2016. Managing Projects

Participation in projects:

Name of the project	Services provided
Service Contract • Airlines Group	Role – AX developer/Architecture • Design Architecture of Integration between Axapta Navision 3 and 1C ERP • Developed via Axapta COM connector APIS for working via Apache Kafka (C#,X++) • Created Ax classes and Methods
Service Contract Dynamics 365 CE On Premise for Estate	Role – Solution Architect / Crm Development Lead • Design solution and integrations • CRM team development management • Implementation of Dynamics 365 CRM • Customize viewers and forms • Design Entities • Developed plug ins and Custom Action • Created Reports • Control process of development • Developed integrations (CRM-1c),(CRM- Asterisk),etc
Service Contract Microsoft D365 FO Implementation	• Design FO Modules Functionality • Design and Developing Integrations • Team management • Code Review, Daily meetings • Deploying Release • Preparing POCs of projects Design and Developing Data Models • Environment Resources Planning and Optimization Design and developing ASP Core extensions and Service for Power BI (DATALAKE) + MS SharePoint Integration, customization, refinement of solutions; • Setting tasks;

	• Team formation and technical assignment; • Finalizing the functionality of the solution; Participation in the presale. • Supply and Problem Fixing Helpdesk managing
Atos IT solutions and services Microsoft Project Operation Implementation	• Design Business Solution • Developers management • Design and Developing Integrations Design business solution (Includes d365 - Finance Operations , CRM modules, Ms SharePoint 2019 online, Power Platform + Asp Core + ASP Core API + Project Operations) • Implementation of LCS and Azure Dev Ops + Git Lab ; • Implementation of LCS and Azure Dev Ops + Git Lab ; • Design and developed Integration Sceneries including Architecture Patterns • Management of Project Teams Code Review, Daily meetings , • Deploying Release • Preparing POCs of projects Design and Developing • Data Models Environment Resources Planning and Optimization Design and developing • ASP Core extensions and Service for Power BI (DATA LAKE) + MS SharePoint Integration, customization, refinement of solutions; • Setting tasks; • Team formation and technical assignment; • Finalizing the functionality of the solution; • Participation in the presale.
Atos IT solutions and services Microsoft Cloud Digital Platform for HealthCare Manufactory	• Design business solution (Includes d365 - Finance Operations, CRM modules, Ms SharePoint 2019 online, Power Platform + Asp Core + ASP Core API) Implementation of LCS and Azure Dev Ops + Git Lab ; • Design and developed Integration Sceneries including Architecture Patterns Management of Project Teams Code Review, • Daily meetings, Deploying Release Preparing POCs of projects Design and Developing Data Models Environment Resources Planning and Optimization Design and developing ASP Core extensions and Service for Power BI (DATA LAKE) + MS SharePoint Integration • customization, refinement of solutions; • Setting tasks; • Team formation and technical assignment; Finalizing the functionality of the Solution Participation in the presale.
Awara IT D365 FO Implementation Scania	• Design and developed Integration d365 fo -1c • Azure development • Developed extensions, APIs, forms • Create data entities

	Used for development Azure SQL Server + C#(.net Core)
Self Contracted D365FO Integration on Insurance	- Design and developed Integration d365 fo – Boss Cadrovik - Design Solution - Apache Kafka Implementations
Self Contracted D365FO Integration	- Design and developed Integration d365 fo -1c - Design Solution - Apache Kafka implementations

Awara IT Client(confedence usage)	• Analysis of customer requirements • Creating solution • Migration from versions • Preparation and approval of design solutions • Optimization Sql Server maintance • Configure and Ingtegrate MS Dynamics Crm and SharePoint Server 2019 • Configure and Integrate MS Dynamics Crm and Project Server • System development using modules based on C # and JavaScript • Design Reports Dashboards+ RSS
Awara IT Client(confedence usage)	• Analysis of customer requirements • Preparation of Terms of Reference • Working with users • System development using modules based on C # and JavaScript • Design Reports Dashboards+ RSS • Configure and Integrate Integration MS Dynamics 2011 Crm and MS SharePoint • Integrate MasterData of company with MS Dynamics 2011
D365 CE Implementation	• Analysis of customer requirements • Creating solution • Migration from versions • Preparation and approval of design solutions • Optimization Sql Server maintance • Configure and Ingtegrate MS Dynamics Crm and SharePoint Server • System development using modules based on C # and JavaScript • Integration crm-1c • Design Reports Dashboards+ RSS
Dynamics 2011 Implementation	• Analysis of customer requirements • Creating solution • Migration from versions • Preparation and approval of design solutions • Optimization Sql Server maintance • Configure and Ingtegrate MS Dynamics Crm and SharePoint Server • System development using modules based on C # and JavaScript • Design Reports Dashboards+ RSS
Dynamics 3,4, 2011 Implamitations Self contratct	• Analysis of customer requirements • Creating solution • Migration from versions • Preparation and approval of design solutions • Optimization Sql Server maintance • Configure and Ingtegrate MS Dynamics Crm and SharePoint Server • System development using modules based on C # and JavaScript Design Reports Dashboards+ RSS
