

Andrii H.

Software QA Engineer

Overview

Years of experience : 5+

Availability : Full-time

Languages: English, Ukrainian

Location: Spain

Tech Stack

API, JIRA, Redmine, Postman, BrowserStack, Blisk, MySQL, Salesforce, Magento, WordPress

Skills

Development

- Functional, Non-functional, Smoke, Regression, Acceptance, Usability, ADA, API
 - Salesforce, Magento, Drupal, WordPress

Tools & Workflow

- Jira, Redmine, Postman, BrowserStack, Blisk, Figma, MySQL
 - Agile, Scrum

Soft Skills

- Attention to detail
 - Adaptability
 - Analytical Thinking
 - Communication
 - Continuous learning
 - Problem-solving

Experience

QA Engineer with nearly 5 years of manual testing experience, primarily in e-commerce, CMS platforms, and cross-browser/mobile compatibility. Skilled in analyzing documentation, creating and executing test cases, and working in Agile/Scrum teams. Previously worked at Speroteck and Internet Devels, supporting over 20 digital projects with thorough testing practices and process optimization.

Projects

Project 1

JIRA, REDMINE,

- Performed manual, cross-browser, and mobile testing to ensure consistent UI/UX across platforms.
 - Designed and executed test cases, including regression testing, in close collaboration with dev teams.
 - Tracked and resolved bugs via JIRA and Redmine, improving release stability.
 - Tested APIs to verify backend integration and data accuracy.
 - Streamlined QA processes to enhance team productivity and product quality.
 - Used Salesforce CMS to manage e-commerce content and support QA workflows.
 - Ensured major product launch with zero critical bugs.
 - Improved test coverage and optimized testing accuracy.
 - Led smooth project handover to support team post-launch.
 - Provided valuable feedback during retrospectives, contributing to process improvements and increased project efficiency.

Project 2

- Analyzed project requirements, mockups, and technical docs to align testing with user needs.
 - Tested website layout and functionality across browsers and devices (incl. tablets).
 - Reported and retested bugs with detailed feedback to improve UI/UX.
 - Collaborated with QA, PMs, devs, and analysts to prioritize tasks and track issues.
 - Supported testing across multiple internal projects with timely, high-quality delivery.
 - Reduced bug recurrence by 20% through thorough testing and proactive feedback.
 - Delivered high-quality testing support on time for over 20 projects, ensuring prompt issue resolution and UI improvements.
 - Recognized for excellence in task prioritization and cross-platform QA execution.
