Male, 25 years

Desired position and salary

Senior Data Engineer

Senior Data Engineer with experience in Azure, Spark, Python, DWH and BI with large technical background.

- Azure Certified Data Engineer;
- Microsoft Certified: Azure Administrator Associate;
- Databricks Certified Data Engineer Associate;
- Databricks Certified Associate Developer for Apache Spark 3.0;
- Experienced in Data ingestion & ETL pipelines;
- Have large experience in DWH processes and solutions;
- Experienced Python developer (Flask, Django);
- Experienced in relational and non-relational databases;
- Experienced in data processing and delivering;
- Experienced in data visualization, design and development of dashboards;
- Have large experience in writing SQL queries and their optimization;

Client Projects include:

- Tinkoff bank (DWH)
- SONEPAR HOLDING SAS

Employment: full time

Work schedule: full day

Travel time to work: any

Work experience —5 years

March 2022 — July 2023
1 year 4 months

EPAM

Tbilisi

Senior Software Engineer

Worked through all stages of a data solution lifecycle.

Created a new data product and integrated it into existing Data Lake.

Designed and built pipelines that extract, process and deliver data to be used for analysis.

Took part in pulling data from various countries and integrating them in common data model

Managed multilayer data warehouse for high-variety data, implemented on Databricks Delta, Azure Synapse Analytics, and Azure SQL Server.

Took part in development of common DataLake processes.

June 2021 — February 2022
9 months

Tinkoff bank

Minsk

Software Engineer

Developed an application in Django for users to help them build their ETL processes.

Mentored new employees and introduced them to the work of DWH.

August 2018 — May 2021
2 years 10 months

GlowByte Consulting

Minsk, www.glowbyteconsulting.com

IT, System Integration, Internet

- Software Development
- System Integration, Technological and Business Processes Automation, IT Consulting

Software Engineer

I was engaged in building BI reporting in such tools as SAP, SAS, Tableau, Apache Zepeplin. I was writing complex SQL queries and working with analytical databases (Postgres, Clickhouse, Oracle, Hadoop).

Took part in developing a custom python library for transporting data between different subd, generating files, updating reports in Tableau, etc.

Administered Apache Zepeplin and developed SRE processes around the product.

Wrote an application in Flask, in which DWH users could conveniently monitor the processes on the schedule and manage their objects in the database.

Education

Master

2020

BELARUSIAN STATE ECONOMIC UNIVERSITY

Institute of Masters Programs (Finance, taxation and credit), Master

2019
