- Highload
- Agile, Scrum

Languages

- English - Professional proficiency
- Russian - Professional proficiency
- Armenian - native

About

A passionate and hands-on software engineer with over 11 years of industry experience. I'm well versed in a wide range of business settings: from early-stage startup MVPs to complex architectures.

I love web development for the fast pace and the opportunity to learn and evolve every day. Key technologies I have worked with involve but are not limited to PHP(all of it), Ruby on Rails, Relational Databases, and Message queues.

Experience

2021 - Present Yerevan	SmartPush Engineering Team Lead I have managed the core product development team, and taken care of product performance and architecture. 2B+ notifications sent daily and webhooks received. Worked with the team to facilitate growth and performance, involved in hiring.
2019 - 2021	Senior Software Engineer Part of the core product development team. Created REST API architecture. Played a key role in scaling the system to highload.
2014 - 2019 Yerevan	STDev Team Lead Developed a range of different projects from scratch to MVP and beyond. Managed a team of 8 engineers on average. Stakeholder management. Scaling team.
2011 - 2014	Senior Web Developer Started from intern and have grown to language agnostic web developer. Mainly focused on SaaS products development.

Teaching

2021 - 2022 Yerevan	Armenian Code Academy PHP course tutor Developed and conducted 2.5 months PHP/Laravel course for a bootcamp.
------------------------	---

Education

2008 - 2012	Yerevan State University (YSU) Bachelor's degree Radiophysics and Microelectronics, Synopsys Educational department
2013 - 2015	Yerevan State University (YSU) Master's degree Radiophysics and Microelectronics
