

Artiom T

Java and Mulesoft Developer

CERTIFICATIONS & TRAINING

MuleSoft Developer (2020)

MuleSoft Certified Developer Certification (2020)

TECHNICAL OVERVIEW

- Java
- ElasticSearch
- Android
- Programming
- OOP Concepts
- Design Patterns
- Maven
- Maven CLI
- Spring
- API
- Spring Boot
- REST API
- Mule 3
- Mule 4
- PM Tools
- Docker
- Jenkins
- CI/CD
- Postman
- Newman
- CLI
- RAML
- Git VC
- GitFlow
- Excel
- Hybris
- JavaScript
- SQL

EXPERIENCE

Optimal Solutions Hub (client MS3) | April 2020 - Present

Project: Case management system with integrated e-commerce and claims management functionalities

Role: Lead Backend Developer

Description:

Designed architecture and led the development of a comprehensive platform using java, enabling business to manage insurance claims, list products, manage inventory, process transactions, manage users, process orders and more.

Responsibilities:

- *Designed and built RESTful APIs for core functionalities.*
- *Integrated 3rd party APIs into project using both SOAP and REST.*
- *Managed data persistence and querying with Hibernate and PostgreSQL.*
- *Enhanced application security with Spring Security and JWT.*
- *Built application with microservices design approach.*
- *Optimized performance through caching, query optimization.*

- Collaborated in an Agile team environment to ensure timely delivery of features.

Skills and Technologies Used

Language: Java 21

Frameworks: Spring Boot (Spring Data JPA, Spring Security, Spring Boot Testing, Spring Boot Actuator), Hibernate

Tools: Docker, Jenkins, Git, RabbitMQ, Maven

Database: PostgreSQL

Testing: JUnit, Mockito

APIs: RESTful APIs, OAuth2, JWT, SOAP, Swagger

Others: Microservices architecture, CI/CD, Scrum methodology

Mulesoft and Java Developer

Spec Driven Development

Develop projects using MuleSoft (Mule3/Mule 4)

Develop projects in Java using Spring Framework

Deploying projects using Jenkins and Docker

- **Client: AmerisourceBergen**

- Migrating mule 3 APIs to mule 4. Migrated APIs consisted of xapi, papi and sapi levels
- Migrated on-prem mule APIs to CloudHub . This includes migrating how file reading logic, changing object storage, applying cloudhub policies and much more
- Was demoing migrated APIs in Sprint Review and Retrospective meetings.
- Writing documentation on how to use CloudHub and how to change APIs settings in it.

- **Client: Alexion Pharmaceuticals**

- Tasked with adding new features to and updating APIs of xapi, papi, sapi levels.
- Tasked with changing existing RAMLS and updating them

Monsato | Nov 2018 - May 2020

Java Developer

Developed new features based on client's requests, this includes Web development and Software Development

Website maintenance

Technology: Java EE + Spring Framework, MS SQL + Hybris + JDBC+ Elasticsearch, JavaScript + jQuery + JSP + CSS, Maven + Ant, Git, Gerrit Version Control

EDUCATION

ULIM University Moldova | MM/2018 - Present
