

# Asadbek A.

Frontend developer

## Overview

Years of experience : 4+

Availability : Full-time

Languages: English

Location: Ukraine

## Tech Stack

JavaScript(React and Svelte), React Native

## Skills

### Development

- JavaScript / TypeScript, HTML, CSS
- GraphQL, REST API
- Web Accessibility, RTL (Right-to-Left) Design

### Tools & Workflow

- React, Next.js, Svelte, SvelteKit, React Native, Expo
- Redux, Zustand
- Material UI, TailwindCSS
- Git

### Soft Skills

- Critical thinking
- Team collaboration
- Agile
- Problem-solving

## Experience

I've successfully delivered numerous projects throughout my career, specializing in high-performance web applications and fully functional admin panels. I'm experienced in identifying and resolving performance bottlenecks using memoization and a range of advanced optimization techniques.

## Projects

### Project 1

- Led frontend for a web app with 10K+ users.
- Collaborated cross-functionally in Agile workflows.
- Solved complex concurrency and performance challenges.
- Built real-time game features for 300K+ participants.
- Maintained clean, maintainable code and ensured clear cross-team communication.
- Delivered from concept to launch with user-driven iteration.

### Project 2

REACT, TYPESCRIPT, NEXT.JS, AGILE, SCRUM, KANBAN

- Built scalable e-commerce solutions in Agile teams.
- Developed modular frontends with React, TypeScript, Next.js.
- Improved load times by 40% through optimizations like lazy-loading, memoization, caching, and throttling.
- Resolved bottlenecks to improve UX.
- Mentored junior developers and managed code reviews.

### Project 3

REACT, TYPESCRIPT, NEXT.JS

- Contributed to outsourcing projects in e-commerce, e-learning, and event management within an agile team.
- Maintained and optimized an online learning platform, boosting customer acquisition by 30%.
- Developed real-time tracking features for a taxi app.
- Collaborated with diverse teams to meet evolving requirements.
- Specialized in React, TypeScript, Next.js, and web performance.

### Project 4

REACT, NEXT.JS, TYPESCRIPT

- Led end-to-end development of custom web apps.
- Translated business needs into user-focused solutions.
- Built with React, Next.js, TypeScript, and modern styling tools.
- Delivered on time, adapting to shifting requirements.
- Strengthened skills in project ownership, problem-solving, and client communication.
