

CHANT

Senior Software Engineer

Summary

Accomplished Software Engineer with 5+ years of hands-on experience in creating dynamic and efficient applications. I have proficiency in React.js | React-Native along with its associated libraries to deliver high-quality code and exceptional user experiences. I enjoy challenging and collaborative environments, contributing to innovative solutions in the ever-evolving field of web development.

EXPERTISE

- React, React Native, Node.js,
- Redux, GraphQL, RESTful APIs,
- Tailwind CSS and Sass/SCSS,
- NodeJs, Nest.js,
- Bootstrap, Material UI, Ant Design, and Styled Components,
- Web scraping with Python,
- Electron

LANGUAGE

- English (Advanced)
- French (Intermediate)
- Arabic (Advanced)
- Armenian (Native)

EDUCATION

American University of Armenia

Master of Science in Computer and Information Science. 2017-2019

Lebanese University

Bachelor of Electronics. 2010-2014

EXPERIENCE

Software Engineer at Devolon

Apr, 2022 - Jun, 2024

- Architected and deployed robust web and mobile applications, handling 10,000+ concurrent users, achieving 99.9% uptime, and boosting user engagement by 50% through efficient load balancing and optimized codebase.
- Upgraded and maintained websites through the integration of cutting-edge technologies and regular performance audits, leading to a 30% boost in site speed and a 20% reduction in bounce rates.
- Created 3 mobile applications using React Native and Expo for cross-platform compatibility.
- Refactored 10,000+ lines of legacy code for enhanced readability and efficiency, reducing system crashes by 40% and improving application performance by 25%.
- Developed over 1000 reusable components, reducing development time and ensuring consistent user interfaces across all projects.
- Translated designs and wireframes into high-quality code for seamless user experiences.
- Led and mentored a small team of front-end developers, fostering collaboration and ensuring the timely delivery of high-quality projects.

Front-End Developer at EliteDevSquad

Aug, 2021 - Apr, 2022

- Engineered 5+ web applications featuring advanced architectures, improving scalability by 40% and reducing server response times by 25%, enhancing overall user experience and operational efficiency.
- Updated and maintained client websites to enhance functionality and performance.
- Created reusable components, accelerating development cycles by 40% and maintaining design consistency across the platform.
- Implemented design specifications into efficient, maintainable code to ensure smooth and intuitive user interactions.
- Optimized components for maximum performance across environments.

Front-End Developer at Ayotech

Aug, 2021 - Apr, 2022

- Developed commercial web applications with a focus on functionality and scalability.
- Enhanced website functionality and performance by implementing advanced caching techniques and code optimizations.
- Contributed to a European financial app, ensuring compliance.
- Conducted code reviews to maintain quality and best practices.

Front-End Developer at NMX Global Software

Jan, 2019 - Aug, 2021

- Built reusable components to enhance development consistency.
- Built high-quality code from designs to deliver seamless and engaging user experiences.
- Optimized components for performance across various environments.
