System Administrator (Linux, Windows, VMware, DevOps, SRE)

Cisco IT Essentials I. PC Hardware and Software

Cisco CCNAE1. Network Fundamentals

Cisco CCNAE2. Routing Protocols and Concepts

Cisco CCNAE3. LAN Switching and Wireless

Cisco CCNAE4. Accessing the WAN

The Internet of Everything (IoE)

NDG Linux Essentials

CCNP ROUTE: Implementing IP Routing

CCNP TSHOOT: Maintaining and

Troubleshooting IP Networks

Installing and Configuring Windows Server 2012

Configuring Advanced Windows Server 2012 Services

Administering Windows Server 2012

Windows Server 2012 R2 Virtualization

EXPERIENCE

RGC

June 2022 – Jul 2023

LEADING ENGINEER WITH COMPUTER SYSTEMS

Web Servers: Install, configure and maintain NGINX servers for high performance and security.

Experience with installing and configuring Apache servers for website hosting.

Reverse proxies and proxy servers: Skills in configuring reverse proxies using NGINX for load balancing and fault tolerance.

Experience with configuring HAProxy as a proxy for high availability and traffic distribution.

Time Synchronization: Ability to set up and maintain time synchronization systems using Chrony, systemd, ntpd to ensure time stamp accuracy and consistency.

Virtualization: Knowledge of installing and managing Hyper-V virtualization to deploy and manage virtual machines.

LDAP (Active Directory) automation: Skills for automating management processes and data synchronization in LDAP (Active Directory) using appropriate tools and scripts.

Containerization: Experience with Docker to build, deploy and manage containerized applications.

Monitoring: Practical skills in setting up system and application monitoring using Zabbix, Grafana, Uptimekuma. Grafana LDAP Authentication on Active Directory

Automation: Knowledge of scripting languages Bash, Ansible, PowerShell to simplify and optimize routine tasks.

Data storage: Experience with installing and configuring Nextcloud for cloud storage and data collaboration.

Namecheap, Inc

BANK " ZEMEL'NIY KAPÍTAL "

March 2019 - February 2021

LEADING ENGINEER WITH COMPUTER SYSTEMS

Work with other team members on objectives.

Hands on knowledge of ESX/VMware environment.

Plan and administer storage and backup solutions with Veeam.

Installation and configuration of Linux (RedHat-based) on various hardware.

Page 1 of 3Working within a Windows Server.

Ensuring compliance with applicable Security Technical Implementation Guides.

Assist in troubleshooting applications deployed on the infrastructure.

Work in an environment including on-premises deployments of infrastructure components.

Ability to work independently with minimal supervision.

Responsible for day to day operations and administration of the IT infrastructure.

Freelance

2018 - 2019

System Administrator

Server Administration. Linux OS administration. Administration of Web servers.

Hypervisor VM administration.

Monitor existing infrastructure.

Monitoring vital parts of the system.

Deploy, configure systems, and maintain corporate systems and network.

User support.

Manage servers, network and business applications.

Administering local networks and Internet channels.

Maintains the security, virtual private networks (VPN) technologies within the network.

Develop and implement measures to improve network security, monitor and resolve incidents.

Work with other team members on objectives.

PrivatBank

2017 - 2018

MAIN OFFICE SYSTEM SUPPORT SPECIALIST | DEPARTMENT OF DATA MANAGEMENT SYSTEMS SUPPORT

Responding to the problems identified by the monitoring system of sql servers (Sybase, DB2, Sybase IQ, PostgreSQL, MySQL, MS SQL Server, Oracle Database) with Nagios:

Identify critical failure, causes, and methods for fixing

Interaction with departments operating databases, complexes

Working together to address incidents

The message of the next deps. information security about incidents and

Page 2 of 3the timing of their elimination.

Performing ongoing scheduled work on database servers on behalf of department administrators, complex owners (alter, reorg, statistics,

reboot, etc.)
Support and monitoring of the performance of the Replication System.
(SAP Replication Server, Oracle GoldenGate)
Work in OS Linux to administer databases

IT-LITE

2015 - 2017

System Administrator

Hands on knowledge of SCVMM/Hyper-V environment.
Plan and administer storage and backup solutions with Veeam.
Working within a Windows Server.
Work with other team members on objectives.
Deploy, configure, and maintain corporate systems.
Manage servers and business applications
