

Edward K

PHP Developer with 15 years of experience

Experienced web developer with 15+ years in building high-performance applications. Specializing in Angular, PHP, and Node.js, I create scalable solutions tailored to business needs across diverse industries, including E-commerce, Healthcare, Media, Food Delivery, and Startups. With a proven track record of leading and managing teams, I deliver robust, maintainable code that drives growth, innovation, and customer satisfaction.

- Java Script
- jQuery
- TypeScript

Pre-Selected Project Experience

Project name	CMS
Project description	CMS for quick launching web-sites
Position	Fullstack developer, Tech Lead
Responsibilities	Architectural Structure Development Database Structure Development Arranging meetings with clients Development process optimization Writing technical documentation Code review Projects estimation Full-Stack development Task management
Tools & Technologies	PHP 7.2, PHP 8
Project duration	August 2022 - January 2025

Project name	Delivery service
Project description	Food delivery service
Position	Fullstack developer
Responsibilities	Architectural Structure Development Database Structure Development Arranging meetings with clients Development process optimization Writing technical documentation Code review Projects estimation Full-Stack development Task management
Tools & Technologies	PHP 7.2/Zend Framework MongoDB Cordova/iOnic Angular 2
Project duration	October 2020 - August 2022

Project name	Marketplace in Great Britain
Project description	Marketplace, rent service
Position	Back-end Developer

Responsibilities	Development and implementation of all front-end parts of application, code review
Team composition	4 developers
Tools & Technologies	Architectural Structure Development Database Structure Development Arranging meetings with clients Development process optimization Writing technical documentation Code review Projects estimation Full-Stack development Task management
Project duration	May 2018 - October 2020

Project name	E-commerce project
Project description	Packaging Delivery Service
Position	Fullstack Developer, Tech Lead
Responsibilities	Arranging meetings with clients BAO Implementation Payment & Third-Party Services Integrations Development process optimization Writing technical documentation Code review Projects estimation Task management
Team composition	4 developers
Tools & Technologies	Angular Node/Express MongoDB
Project duration	August 2019 - September 2022

Project name	Medical application
Project description	Medical application for patience
Position	Fullstack developer
Team composition	2 developers
Responsibilities	Architectural Structure Development Database Structure Development Arranging meetings with clients Development process optimization Writing technical documentation Code review Projects estimation Full-Stack development Task management
Tools & Technologies	Cordova/iOnic PHP/Laravel MySQL
Project duration	January 2018 - May 2020

Project name	Dashboard platform
Project description	Platform which allows user to create and manage his own web-site. Extensive work with content and interaction with social networks.
Position	Tech Lead, Fullstack developer
Team composition	10 developers
Responsibilities	Architectural Structure Development Database Structure Development Arranging meetings with clients Development process optimization Writing technical documentation Code review Projects estimation Full-Stack development Task management
Tools & Technologies	PHP/Zend Framework/Yii JavaScript/NodeJs/Express jQuery/jQuery Plugins/Bootstrap/HTML/CSS 3 Imagick/GD MongoDb/MySQL/Memcache/Redis Cordova/iOnic/Angular
Project duration	August 2015 - June 2019
