

Thailand

SUMMARY

As an experienced Technical Lead in the field of Fintech and DevOps, I have been leading teams of up to 20 people for over 10 years, implementing innovations for business growth and efficiency. I specialize in developing and implementing technology strategies, integrating Agile and DevOps processes to optimize development. I have experience in designing architecture for high-load systems, solving complex technical challenges, and contributing to the company's development.

PROFESSIONAL EXPERIENCE

DevOps Architect

10/2022 - Present

Invent.us - wealth management, fintech

- I completely redesigned the infrastructure, implementing automation and developing a two-year strategy.
- Led a complete overhaul and implementation of advanced CI/CD pipelines, IaC, reducing the time to create new environments from 3-4 days to 1-2 hours.
- Managed a team of 14 engineers in refactoring all scripts and infrastructure, creating highly stable and standardized environments.
- Achieved savings of over \$350,000 per year by transitioning to optimized cloud solutions.
- Grew and developed a team of 14 engineers.
- Obtained the SOC2 certificate, confirming the security and reliability of the systems.
- Gained Microsoft Gold partnership status.

DevOps Architect

07/2020 - 10/2022

Innotech - banking, fintech

Innotech is a huge technical division of major Russian Bank "VTB", like Bank of America in the US, or HSBC in the EU.

- Ensured the implementation of standards and documentation for new projects, optimizing the CI/CD process and accelerating deployment by 9 times.
- Transformed monolithic legacy systems into microservices applications.
- Developed infrastructure as code (IaC) and CI/CD pipelines using Kotlin DSL, Helm, and Bash.
- Founded a DevOps community with 515 engineers, including processes and events to foster collaboration.

Lead DevOps, SRE

03/2019 - 08/2020

Nokia - telecom, IoT

- Developed infrastructure as code (IaC) for an IoT platform on Kubernetes using Ansible.
- Conducted pre-sales demonstrations that resulted in securing two new contracts.
- Developed automation for service processes and system updates.
- Organized automated testing of software and hardware sensors.
- Managed a team of SRE specialists for infrastructure development and support.

IT Infrastructure Architect

07/2015 - 03/2019

PPTK Ltd, Gazprom group

System Administrator, assistant Head of IT

12/2013 - 07/2015

CG Samotlor LLC

System Administrator

01/2012 - 05/2013

ITECO LLC

SKILLS
