- Kubernetes

### MY PROFILE

Experienced Senior Full Stack Developer proficient in front-end and back-end technologies, frameworks, and tools. Exceptional problem-solving skills and expertise in architecting complex systems. Effective communicator, leader, and mentor with a proactive attitude. Ready to apply my passion for coding to a talented engineering team to develop quality solutions.

### EXPERIENCE

#### Senior Full Stack Developer

Icyber / Sydney, Australia

Nov 2021 – Mar 2023

- Worked closely with the Product team to get business requirements & logic and converted all the business requirements into technical requirements, so all the developers could have a firm understanding of requirements.
- Built pipeline scheduling and execution platform and corresponding front end to manage and interact with the platform.
- Analyzed and optimized performance bottlenecks in 3+ existing back-end systems, such as database queries and storage solutions, to increase responsiveness.
- Wrote structured, tested, readable, and maintainable code.
- Developed and maintained 3+ front-ends focused on user experience.
- Created informative and effective documentation, reports, and inline comments on 100% of code/work accomplished.

#### Senior Full Stack Developer

YappiX / Redding, United States

Feb 2018 – Oct 2021

- Applied hands-on learning and agile development to build full MERN stack applications.
- Provided priority one customer support for incidents and bug fixes, maintaining a 99% SLA for response and resolution times.
- Provided infrastructure and integration guidelines for load-balancing and web-farm deployment.
- Work in TDD (Test-Driven Development) and performed testing using Jest and Cypress.
- Excellent experience creating Restful/GraphQL web API, and microservices, with containerized applications like Docker, Kubernetes, etc.

#### Full Stack Developer

Salop / Tokyo, Japan

Dec 2014 – Dec 2017

- Functional specification reviews to ensure consistency and accuracy with the client's needs.
- Worked with UI designers and product owners to implement new features, develop new products, and address bugs.
- Followed industry best practices, and company best practices, and learned 3 new technologies.
- Drove best practice implementation all the time.
