Work Experience

Induction Healthcare Group - Rails Developer 2022 Apr - Present

- Mainly participated in fullstack development of the Induction Zesty app. Patient engagement system with integration of the UK's National Health System with ~2m+ users.
- Took full responsibility to extend the app's features like building a new interface that handles online file management by implementing AWS S3 Ruby SDK.
- Learned enough Vue.js in 1 week to help with frontend development of components, e.g Custom Type Search Bar that made searching data easier and is used all over the app now.

Tools: Rails, Vue.js, Postgresql, Redis, Sidekiq, AWS...

Freelance - Rails Developer 2021 May - 2022 Apr

- Worked as a contractor for EPAM and other companies. Mainly Fullstack(Rails/React) development of legacy e-commerce project.
- Implemented architectural solutions using Design Patterns suit for legacy project like Interactors, Decorators and Service Objects.
- Optimized time efficiency of API requests and SQL queries.

Samsung Electronics - Software Developer 2020 Sep - 2021 May

- Worked on 3 projects that included a CRM system for official brand zones all over Kazakhstan, Online School for 400+ teenagers and Official Samsung Page.
- Built an Attendance System for Online School which made it possible to track and analyze students' attendance.
- Gamified Online School experience by implementing a ranking and badge system. Participation in tests and exams rose up to 80% - 90%.
- Developed REST APIs, rearranged searching system and updated workflow by teaching myself Django framework in 2 weeks for a CRM system.
- Built pixel perfect promotional Single Page Applications and managed Adobe Experience Manager.

Freelance - Full Stack Web Developer 2018 Feb - 2020 Sep

- Built end-to-end 15+ Web Applications like e-commerce sites, blog-post sites, online classrooms, telegram bots and CRM systems mainly using Rails. Many of them you can find on my portfolio page.
- Covered projects with tests using concepts like BDD and TDD using tools like Rspec, shoulda-matchers, factory-girl, fakers.
- Developed REST APIs, optimized SQL queries and integrated third party APIs like Telegram API, Google APIs and more.
