

Oleg

Web developer

Work experience -13 years 10 months

February 2022-
present

Noveo

Client-side development as a backend developer (Django, DRF,.djangosaml2, PostGIS, snowflake), a bit of React

May 2021-January
2022
9 months

Lmarkt.com, a musical instrument marketplace

Fullstack developer. Support of delivery integrations, API development for customers, development of new functionality for the operators and a store, code reviews, periodic assistance to juniors, writing tests including Selenium

Django REST Framework, PostgreSQL, Docker, Redis, Celery, React

March 2021-May
2021

3 months

Telegram bot for registering applications of equipment failures at various facilities that my client works with. Site managers use the bot to register an issue request with equipment at their site. The request is sent to repairmen in the appropriate city. After fixing the equipment, the repairman marks the request as completed in the bot, describes the cause of the breakdown and the spare parts used.

Registration in the bot by the phone number of managers, repairmen, (name, city, object), maintaining the database in Django-admin, a couple of pages for reports for customers.

Development of a bot and website on django in a team of two people, mentoring a junior.

Django REST Framework, Django admin, jquery, aiogram, aiohttp

March 2019-August
2020
