

PHILIPP

FRONTEND DEVELOPER

ABOUT ME

I bring several years of experience working with some of the biggest companies in Russia, contributing to high-impact projects with diverse technology stacks. I have experience working with three popular JS frameworks and have successfully developed and maintained several applications from scratch. I am passionate about creating user-friendly and responsive interfaces, ensuring seamless experiences for users who interact with the applications I build. I am always eager to learn and improve my skills, and I am excited to bring my expertise to new challenges and projects.

WORK EXPERIENCE

Frontend developer

Freelance

April 2023 — present time

As a freelance web developer, I had the opportunity to work on various projects for clients across different industries. During this time, I honed my skills in web development and provided valuable services to my clients. My freelance work allowed me to further develop my technical skills, project management abilities, and client communication skills. It also demonstrated my capacity to adapt to diverse project requirements and deliver high-quality web solutions.

Frontend developer

Practica.wear

July 2022 — April 2023

In my role as a web developer at an online store specializing in handmade accessories, I was responsible for developing and maintaining a web application. For the frontend I used Vue.js, which significantly enhanced the website's usability and loading speed. The integration of Vuetify into the design ensured a responsive and stylish appearance, giving the application a modern and professional look. Through my efforts and individual contributions, the online store achieved a more appealing and functional website, resulting in increased traffic and sales.

Frontend developer

Adoptech

September 2021 — May 2022

As a Frontend Developer at Adoptech, I was responsible for maintaining the company's landing page and the main application, which was a B2B platform featuring a policies and agreements generator. Using React & Redux I was collaborating with other team members to develop new features and to troubleshoot and debug issues, ensuring a smooth and seamless user experience for all clients.

Frontend developer

X5 RETAIL GROUP

July 2020 — September 2021

As a Frontend Developer at X5 Retail Group, I played a key role in developing and maintaining a CRM system for internal use, as part of a software team. The project, named OKOLO, was a large e-grocery system focused on delivery. Some of my notable achievements include:

- Developing the frontend of the OKOLO CRM system from scratch using Vue JS, Vuex, and TypeScript, resulting in a modern and responsive user interface.
- Collaborating with the team to debug and troubleshoot issues, ensuring timely delivery of high-quality features.

PHILIPP

FRONTEND DEVELOPER

WORK EXPERIENCE

Frontend developer

Goods.ru

April 2020 — July 2020

As a Frontend Developer at Goods.ru marketplace, a large platform offering a wide variety of products, I played a key role in building a small Vue JS frontend CRM app based on a micro frontend architecture that allowed merchants to create and control promotions.

Frontend developer

Rambler&Co

June 2019 — April 2020

At Rambler Group, I was initially involved in maintaining a legacy project written in Backbone JS. The project was a web widget that enabled customers to purchase tickets for a range of events, including festivals, exhibitions, and movie shows. After that, I joined a newly created software development team for a project with the same functionality and refreshed design using Vue JS.

Frontend developer

Yandex.Chef

June 2018 — June 2019

At FoodParty, the startup that was later acquired by Yandex, I was involved in maintaining a frontend app written in Angular JS (1.6) and an API on Node JS + Express. The company was delivering dinners that customers had to cook themselves.

Frontend developer

Traffic Isobar

March 2018 — June 2018

At Traffic Isobar, I was responsible for creating and maintaining marketing landings and email newsletter templates using HTML, CSS, and JQuery. Some of my notable achievements in this role include:

- Using HTML, CSS, and JQuery to develop effective products that met customer needs and specifications.
- Ensuring that everything was properly optimized for SEO and responsive design, resulting in increased traffic and engagement from customers.

Frontend developer

Opendev LLC

July 2017 — March 2018

At Opendev, I started my career as a frontend developer and was involved in developing training projects and production projects using HTML, CSS, React JS, and Node JS.

System administrator assistant

SCTS LLC

April 2017 — July 2017

As a system administrator assistant, I was responsible for assembling and setting up PCs and configuring Windows operating systems.
