

Tech-savvy Full Stack Web and Mobile Developer who is proficient in fundamental front-end languages and server-side languages. Analytical and precise professional with 6+ years of hands-on experience taking charge of front and back-end web development. Skillful in creating servers and databases for functionality and designing and developing APIs. Hardworking collaborator with a track record of superior results. Seeking to further improve self-skills by taking part in major development as a full-stack developer.

Education

2015-10 - 2018-10 **Bachelor’s degree: Information Technologies**
University of Belgrade - Belgrade, Serbia

Work History

2021-06 - Current **Full-Stack Developer**
Freelancer, Belgrade, Serbia

- Launched an internal order management system utilizing primarily PHP and MySQL to introduce a more scalable and reliable solution that allowed 100% deadline compliance.
- Developed app integration with REST / SOAP and other APIs for Google Maps, social media logins, payment processors, and other services.
- Provided business development support by assisting in RFP/RFI response drafting, presentations, collateral creation, and recommendations.
- Worked closely with core technology teams and other platform teams to balance cross-platform consistency with Android-optimization.
- Developed and maintained 30+ REST APIs writing documentation using OpenAPI specifications.

2020-05 - 2021-06 **Senior Software Developer**
Concordsoft Solutions, Subotica, Serbia

- Coordinated with the software engineering teams to develop scalable code for an online payment provider with over 50M active users, which included designing front-end and back-end services in Python.
- Designed cutting-edge software applications to support EHR systems for a major health insurance agency with over 20M insurees, troubleshoot programming errors, and automated software testing processes to save over \$100K in annual labor costs.
- Managed 50+ Linux servers with 99.99% uptime, created a Docker container cluster using Kubernetes/Docker Swarm, and prevented network failures.
- Spearheaded project for improving deployment process and automating manual testing processes, which saved over 100 labor hours per week and supported enhanced resource allocation during a period of revenue growth totaling over \$2M.

Skills

C#, Java, GoLang , Python
Very Good

HTML, CSS, JS(ES6/TS)
Very Good

UI(Twitter Bootstrap, Material-UI, AntDeisgn, Tailwind, Vuetify)
Good

Three.js, D3.js, GSAP
Good

PHP, CI, Laravel
Excellent

WordPress, E-Commerce, Shopify, Wix, Squarespace
Very Good

React, Vue, Angular
Excellent

NodeJS(MERN, MEAN and MEVN Stack)
Very Good

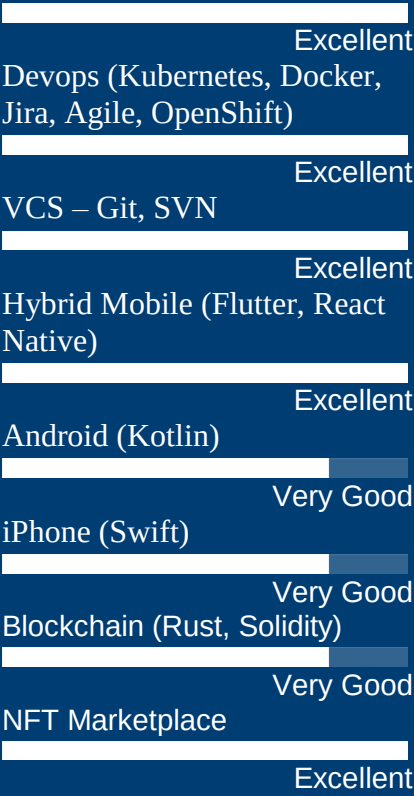

Django, Ruby on Rails
Very Good

ASP.NET
Very Good

Azure Server, AWS, DigitalOcean
Excellent

Knowledge of TCP/IP Protocol
Excellent

Bubble.io, ProcessWire, Webflow

2019-01 -
2020-04

Full Stack Web Developer

Future Forward, Nis, Serbia & Brielle, Netherlands

- Managed a large-scale redesign project for the website, improved page speed by 15%, and incorporated user-centered design principles to increase average time on page from 52 seconds to one minute and twenty seconds.
- Managed and updated company PHP databases, and developed app integration with REST and APIs for Google Maps and payment processors.
- Developed prototypes, user interface design, and wireframes for the company website of a leading west coast insurance company, which included creating landing pages.
- Developed and built dynamic user interfaces to support large-scale e-commerce platform projects in Agile environments for enterprise client accounts valued at up to \$3M.

2017-03 -
2018-12

Freelance Web Developer

Freelance, Belgrade, Serbia

- Created a fully functional website featuring upcoming news updates for upcoming film productions, casting, and release dates, conducted coding in HTML and CSS, and ensured mobile functionality.
