

Summary

Expert Full Stack Developer with 10 years of expertise in building large-scale and complex web applications using PHP (Laravel/Symfony) and JavaScript (Vue.js/React.js). Specialized in creating efficient admin dashboards, scalable SaaS platforms, and delivering high-quality web solutions tailored to business needs. Proficient in integrating REST APIs, optimizing performance, and ensuring seamless user experiences through modern front-end and back-end technologies. Focused on developing maintainable, secure, and scalable systems that align with client objectives.

Experience, Projects

10.22 - now

Full Stack Developer, Team-Lead

I've been developing projects for internal use for a BigCommerce company, such as the PIM and Real-time analytical systems.

Technologies used: Laravel, VueJS, ReactJS, ClickhouseDB, Apache Druid, Kafka, Appolo, GraphQL, BigQuery

Achievements: Built a real-time big data analytical system based on a Columnoriented database for BigCommerce with 1000+ orders/day. Developed a backendless application on React+GraphQL to manage 10000th of products.

Responsibilities: Architecture planning, regular development, code reviews, daily team meetings, and new team members onboarding.

05.21 - 10.22

Full Stack Developer, Team-Lead
