

Vladyslav S.

Full-Stack Developer (PHP/ Magento Developer)

EXECUTIVE SUMMARY

- Highly skilled PHP/Magento developer with 6+ years of experience in web development.
- Proficient in creating and maintaining Magento 2 modules, integrating APIs, and building custom eCommerce solutions.
- Adept in back-end and front-end development, refactoring legacy code, performance optimization, and security management.
- Experienced in handling large-scale eCommerce websites and providing technical leadership in diverse projects, working with Magento, Shopify, and WordPress.

TECHNICAL SKILLS

Description	Technologies and Frameworks
Programming Languages/Technologies	PHP, JavaScript, XML, HTML5, CSS3, OOP, MVC
Version Control Systems	Git
Development Environments and Tools	PhpStorm, WebStorm, Jira, Git/Github/Bitbucket/Gitlab
Databases	MySQL, NoSQL (Redis)
Frameworks and Libraries	Magento 2, Wordpress, Shopify, Laravel, Symfony, ZendFramework
Operating Systems	Linux, Windows, macOS
Other	API Integration, SOAP/REST/GraphQL, ElasticSearch, Varnish, CloudFlare, UNBXD, Microservices, CI/CD, Docker, Vagrant

MAIN PROJECTS

Project 1:	Dashdevs Leading development on a WordPress project with a focus on legacy code refactoring, implementing new features, and managing security aspects during migration to Shopify.
Role: Years:	Senior PHP Developer 10.2022 - 02.2025
Technologies:	WordPress, Shopify, PHP, JavaScript.
Responsibilities:	• Led the refactoring of existing code to enhance maintainability and performance. • Implemented new features based on client specifications, ensuring alignment with project goals. • Conducted security assessments and managed cyber defense protocols. • Collaborated closely with the client to understand requirements and provide updates. • Developed technical documentation for ongoing maintenance and knowledge transfer. • Managed CI/CD processes to streamline deployment workflows.

Project 2:	Barwenock Developed new features for an e-commerce platform, overseeing both front-end and back-end enhancements, including migration efforts to Shopify.
Role: Years:	PHP/Magento Developer 07.2021 - 10.2022
Technologies:	Magento 2, PHP, JavaScript, Shopify, MySQL, RESTful APIs, Docker, Git, HTML5, CSS3.
Responsibilities:	- Created and implemented new functionalities to improve user experience and site performance. - Conducted code reviews to ensure high standards of quality and performance. - Collaborated with cross-functional teams to integrate features seamlessly. - Developed and maintained documentation for project specifications and updates. - Resolved issues related to legacy code during the migration process. - Extended third-party integrations to enhance platform capabilities.

Project 3:	Ronis Developed features for a Swiss fintech questionnaire application, focusing on API integration and custom logic.
Role: Years:	PHP/Magento Developer 09.2020 - 07.2021
Technologies:	Magento 2, PHP, API Integration, Symfony
Responsibilities:	- Gathered requirements and collaborated with stakeholders to define project scope. - Designed and developed new pages with custom functionality tailored to user needs. - Integrated third-party APIs for enhanced data processing capabilities. - Tested and debugged applications to ensure optimal functionality. - Provided ongoing support and feature enhancements based on user feedback. - Wrote unit tests to ensure reliability and reduce bugs in production.

Project 4:	RockLab Maintained and optimized a Magento 2 clothing brand store, addressing various issues related to product display and third-party integrations.
Role: Years:	PHP/Magento Developer 07.2019 - 09.2020
Technologies:	Magento 2, PHP, MySQL, JavaScript, HTML5, CSS3, Redis, Elasticsearch, REST APIs, Docker, Git, Varnish, Cloudflare.
Responsibilities:	• Diagnosed and resolved bugs impacting product types and third-party functionality. • Collaborated with design and development teams to implement UI/UX improvements. • Optimized performance metrics to improve site load times and user engagement. • Created comprehensive documentation of changes and best practices for future reference. • Trained junior developers on the project's architecture and coding standards.

Project 5:	Wise Developed and maintained Magento-based solutions, focusing on optimizing backend processes and enhancing overall system performance.
Role: Years:	PHP/Magento Developer 12.2018 - 07.2019
Technologies:	Magento 2, PHP, MySQL, JavaScript, REST APIs, Docker, Git, CI/CD, Varnish, Cloudflare, Elasticsearch.
Responsibilities:	• Conducted backlog estimation to prioritize features and improvements based on business needs and technical feasibility. • Refactored legacy code to improve performance, readability, and maintainability of the application. • Provided ongoing project support, troubleshooting issues, and implementing effective solutions to ensure seamless operation. • Collaborated with cross-functional teams to gather requirements and develop features that aligned with user expectations. • Conducted code reviews to uphold quality standards and mentor junior developers in best practices. • Engaged in regular meetings with stakeholders to communicate project progress and gather feedback for continuous improvement.

EDUCATION

Master of Science in Software Engineering (Kharkiv National Aerospace Institute)
Bachelor's degree in Cybersecurity

Bachelor's degree in Cybersecurity Management (Kharkiv National University of Radio Electronics)

Junior Specialist's degree in Software Engineering (Kharkiv Radiotechnical College)
